#### Term

This sub-fund has no maturity date. However, the manufacturer may decide to close the sub-fund under certain circumstances.

#### Objectives

The objective of the sub-fund is to achieve medium- and long-term capital growth through direct and/or indirect investment in shares issued by companies with the majority of their activity in different predefined, selected and weighted global economic sectors. Selected by the manager on the basis of their profitability forecast.

LUX-EQUITY BEST SECTORS invests:

- 1) mainly in shares issued by companies that carry out the majority of their activity in the following sectors: information technologies, materials, healthcare, financials, industrials, consumer discretionary, non-cyclical consumer staples, utilities, real estate, telecommunications, energy;  
The allocation to a given sector on this list can vary between 0% and 100% of net assets.
- 2) incidentally in cash;
- 3) up to 25% of its net assets in other assets permitted under the Investment Restrictions in the prospectus (including other shares than those mentioned above, bonds and money market instruments).

These different investments can be made directly and/or indirectly (for example by means of UCIs/UCITS, including ETFs). The proportion of assets invested indirectly in such instruments can only be on an accessory basis (up to 49% of net assets).

The sub-fund's assets may include, for a minority part, securities of issuers domiciled and/or listed in emerging countries as well as UCIs/UCITS and/or other instruments authorised under the Investment Restrictions in the prospectus, with an emphasis on emerging markets.

The sub-fund may use, for the purpose of good management and/or hedging, all derivative financial instruments (such as forex, futures, options, etc.),

warrants and the other techniques/instruments set out in the Investment Restrictions in the prospectus and within the limits provided.

*Benchmark:* The portfolio is actively managed on a discretionary basis without reference to a benchmark.

## What are the risks and what could I get in return?

### Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

**Be aware of currency risk.** You may receive payments in a currency that differs from your reference currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The sub-fund is also exposed to the following materially relevant risks that are not included in the summary risk indicator: Liquidity risk, Counterparty risk, Operational risk.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

## What happens if Spuerkeess Asset Management S.A. is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation or guarantee scheme. To protect you, the assets are held with a separate company, the depositary Banque et Caisse d'Epargne de l'Etat, Luxembourg. Should we default, the investments are liquidated and the proceeds are distributed to the investors. In the worst case, however, you could lose your entire investment.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

<b>Total costs</b>	529 EUR	1,614 EUR
